### NKT Wins Contract for Canadian Transmission Line; Completes New Extrusion Tower in Sweden

NKT has signed a contract for the HVDC onshore power cable system for the Hertel-New York project, developed by **Hydro-Québec**, which is the Canadian transmission line that will connect to the Champlain Hudson Power Express (CHPE) transmission line. The contract includes design and manufacturing of a 2 x 60 km 400 kV HVDC onshore cable system. The project has an estimated contract value for NKT of some €90 million.

Also, in 2020, NKT initiated an investment program in its high-voltage factories driven by a record high order backlog and a positive market outlook driven by the transition to renewable energy. A key part of the program was

to add a new extrusion tower to the Karlskrona Sweden factory. NKT has now completed the construction and is starting production in the tower during Q4 2022, which marks an important milestone in the ongoing high-voltage business investments. [www.nkt.com](http://www.nkt.com)

### Global Power Cables Industry: \$224 Billion by 2027

The "Power Cables Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027", report has been added to Dublin, Ireland-based **ResearchAndMarkets.com's** offering. The global power cables market reached a value of US\$156.3 billion in 2021, and looking forward, the publisher expects the market to reach US\$224.1 billion by 2027, exhibiting a CAGR of 6.19% during the period from 2021 to 2027. Companies mentioned in the report include **Prysmian SpA, Encore Wire Corp., Finolex Cables Ltd., Fujikura Ltd., Furukawa Electric Co. Ltd., Hengtong Group Co. Ltd., KEI Industries, LS Cable & System, LEONI, Nexans, NKT A/S, Southwire, Sumitomo Electric Industries Ltd.** and **TPC Wire & Cable.**

Surging consumption of electricity around the world and focus on upgrading existing grid infrastructures are positively influencing demand for power cables. And expanding construction in the residential, commercial and industrial spaces is contributing to market growth. Also, ResearchAndMarkets continuously tracks and evaluates the direct and the indirect influence of the pandemic on different end use industries. ### Milestone for Prysmian Group Suedlink Project

With the start of cable production at **Prysmian Group, Sued-Link**, the largest infrastructure project of the energy transition in Germany with a length of around 700 km and 4 GW of transmission capacity, has reached another milestone. Prysmian started the production of a  $\pm 525$  kV HVDC underground cable system at its French plant in Montereau, which allows a transmittable power of 2 gigawatts on a single system.

The transmission system operators, **TransnetBW GmbH** and **TenneT TSO GmbH**, have commissioned the globally operating cable manufacturer based in Milan to plan, manufacture, deliver and install a 580 km section of SuedLink. It connects Wilster in Schleswig-Holstein via the north-west of Hamburg to the southern connection point in Bergheimfeld near Schweinfurt in Bavaria. **NKT** is in charge of the project's connection from Brunsbüttel in Schleswig-Holstein to Leingarten in Baden-Württemberg.

### LEONI Honors Top Suppliers with Awards

**LEONI AG**, Nuremberg, Germany, has honored its top suppliers with the Supplier Award 2022 and invited all its suppliers to close partnership and intensive cooperation along the entire value chain.

Weakening demand coupled with high volatility in the markets, unstable supply chains for raw materials and primary products and growing cost pressure in energy and logistics require even better coordination along the entire value chain, explained LEONI CEO,

**Aldo Kamper**, to several hundred participants at the company's virtual *Supplier Summit 2022*. The forecasts for the market development of the automotive industry in the coming year are currently cloudy.

Kamper said, "Reliable and cooperative partnerships

between manufacturers and suppliers for mutual benefit are essential in order to react to volatility in a more targeted manner and to share burdens fairly."

A central topic of the event was sustainability. Among other things, LEONI presented its strategic sustainability program ReWire, which includes all sustainability goals and activities along the value chain, and will thus also make the future purchasing strategy towards suppliers and partners more sustainable and efficient. [www.leoni.com](http://www.leoni.com)

### TKH Group appoints Head of Investment Relation and Corporate Communications

TKH Group announces the appointment of Jacqueline Lenterman as Director of Investor Relations and Corporate Communications. She will join the TKH Management Board. Lenterman will take over the IR responsibilities from Erik Velderman, who will now fully focus on leading the growing Airport solutions business within TKH Group. Alexander van der Lof, CEO of TKH Group, said, "I am pleased to have Jacqueline join us to lead our Investor Relations and Corporate Communications activities. As we are implementing our Accelerate 2025 strategy, we place even greater

value in communicating with all our stakeholders including shareholders. With Jacqueline on board, we can now prioritize these dialogues."

## Southwire & WGTC Unveil New Precision Manufacturing and Maintenance Lab

On November 3, 2022, **West Georgia Technical College (WGTC)** held a lab naming reception to unveil the new **Southwire Precision Manufacturing and Maintenance Lab** located at the WGTC Carroll Campus. The renewed commitment and partnership with Southwire represent a total contribution of US\$500,000 from the industry-leading manufacturer over the next three years as well as includes the expansion of opportunities for programming and training.

"We are so grateful to Southwire for their support and dedication to our College, as well as the ongoing commitment to furthering the advancement, education and training of our manufacturing students," said **Brittney Henderson**, Executive Director of Institutional Advancement and the Foundation of

WGTC. "This new state-of-the-art lab now has life because of Southwire's generous donation."

In addition to naming the lab, Southwire will also provide equipment and partner with WGTC in order to foster corporate training relationships through the College's Economic Development and Community Affairs and Adult Education divisions.

### HEW-KABEL & Habia Cable Plan to Merge Into Group

As the acquisition of **Habia Cable** by **HEW-KABEL Holding GmbH** is completed, the two cable companies announce their intention to merge to form a leading specialist cable and connectivity group serving the global market. The announcement begins a merger process, which will be undertaken in phases over the coming months. HEW-KABEL and Habia Cable will be brought together as one, combining the technical and commercial strengths of both to create a leading specialist cable and connectivity group serving the global market.

While both companies specialize in developing tailor-made cable solutions for complex, demanding applications and harsh environments, their complementary markets, capabilities and expertise will offer broad potential for future growth. The necessary work will now be undertaken to align and merge the two companies, speaking directly with all customers, partners and suppliers before any changes come into effect. ### Taihan Cable & Solution Building EHV Cable Plant

According to local reports, **Saudi Arabia's Ministry of Investment (MISA)** has recently signed an agreement with South Korea's **Taihan Cable & Solution** to establish a new extra-high-voltage (EHV) cable and copper rod manufacturing plant.

Taihan said it would provide 51% of the US\$80 million investment in the new factory, which covers 70,000 m<sup>2</sup> in a high-tech industrial complex in Riyadh, Saudi Arabia. [www.taihan.com](http://www.taihan.com)

### JDR Cables Starts Work on Subsea Cable Facility

**JDR Cable Systems**, part of the **TFK Group**, has begun construction work on a new 69,000 m<sup>2</sup> factory in England, which will be operational by 2024. The £130 million project will deliver subsea cable manufacturing technology to the offshore wind market and is providing 171 jobs for the construction phase.

When complete, the facility will include a new catenary continuous vulcanisation (CCV) line, making it the only facility in the UK capable of full start-to-finish manufacturing of high voltage subsea cables for offshore wind farms to support the growing global renewable energy market. ## High International Participation at wire & Tube Southeast Asia 2022

The well-established trade fairs *wire Southeast Asia* and *Tube Southeast Asia*, staged an impressive comeback alongside the debut of the *GIFA* and *METEC SOUTHEAST ASIA* trade fairs recently held in Bangkok, Thailand. With 244 exhibitors from 32 countries and about 6000 visitors from 60 nations (with 30% coming from outside of Thailand), the events exceeded expectations.

Exhibitors from all industry sectors were very pleased with their in-person participation, with many commenting on the optimistic atmosphere and positive post-show business expectations. About 90% of attendees gave the trade fairs high ratings. The majority of international visitors came from Australia, Bangladesh, Indonesia,

India, Malaysia, Pakistan, Singapore and Vietnam. For the 76 local visiting groups, representing the target sectors of wire and cable manufacturers, iron and steel and nonferrous metal industry and from upstream supplier industries, the events offered a one-stop platform to see innovations and new technologies from international brand names. [www.mdna.com](http://www.mdna.com)

business through an equity investment in KT Submarine, which is part of the KT Group.

On October 11, 2022, LS Group announced that LS C&S had participated in the third-party-allotment recapitalization of KTS and will acquire 16% of the total outstanding shares, or 4.04 million shares, for KRW 25.2 billion. Once the acquisition agreement is concluded, LS C&S will be KTS' second largest shareholder behind KT. LS Group projects that the subma-

rine cable market will continue to grow due to the growth in the offshore wind power generation market and increase in global internet use resulting from carbon neutrality policies that are being implemented worldwide.

Group sales from continuing operations of around €955 million (Q3 2021: €893 million); EBIT before exceptional items from continuing operations of around €-56 million (Q3 2021: €-3 million); reported EBIT from continuing operations of around €-71 million (Q3 2021: €-20 million); and free cash flow from continuing operations of around €-63 million (Q3 2021: €-85 million).

Group sales in the third quarter of 2022 were around 7% higher than in the previous year.

In Q3, highly volatile product call-offs resulting from ongoing supply chain disruptions on the customer side as well as higher raw material and logistics costs again had a significant impact on earnings. This negative earnings impact was partially offset in the third quarter by agreements reached with customers over contributions to the cost increases incurred in previous quarters. A one-off earnings effect of around €-7 million also resulted from the change in FX positions as part of the carve-out of discontinued operations.

In addition, the recognition of non-cash provisions to cover contingent

losses had a negative impact on earnings of some €31 million. Learn more at the LEONI AG website.

## HELUKABEL reports new UK market labeling requirements

The European conformity marking CE is about to be discontinued in Great Britain. Starting on January 1, 2023, after a two-year transition period, only the British UKCA (UK Conformity Assessed) marking will be accepted in the UK. This also affects HELUKABEL cables, wires and accessories.

It is not yet clear how the UKCA marking will be regulated next year, but HELUKABEL is in constant contact with the responsible authorities through its British subsidiary, HELUKABEL (UK) Ltd. This ensures that the company is informed in a timely basis about all future decisions on this topic. The UKCA mark is currently only printed on our product labels. As soon as there is more regulatory clarity, we will also apply it to products and data sheets.

HELUKABEL stated that it is convinced that the company will be able to offer its customers in the UK its products and solutions reliably and in compliance with the regulations in the future as well. The company will also keep customers informed about further news on the subject of UKCA certification.

### Nexans Signs Empire Wind Contract to Bring Renewable Energy to New York

Nexans, has announced the execution of a significant contract for Nexans phase one of the Empire Wind Project being developed by a 50-50 partnership between Equinor and bp. This signature follows the Preferred Supplier Agreement signed in March 2021, which prompted several months of collaborative work to negotiate a turnkey contract, covering the design, manufacturing and the laying and protection of export cables for the project.

The Empire Wind lease area for the first phase of the 2.1 gigawatt project is located about 20 miles (33 km) south of Long Island and east of the Rockaways. Nexans will install the export cables over 93 miles (150 km) from the offshore substation for Empire Wind 1 to landfall at South Brooklyn Marine Terminal.

The project will bring electricity to over 500,000 homes of the eventual over 1 million homes to be powered by the Empire Wind project. New York is one of the most aggressive states in committing to a fully carbon-free statewide economy, with offshore wind energy as the main source of electricity by 2035.

### Carlisle Companies issues equity grant to employees

**Carlisle Companies Inc.**, Scottsdale, AZ, USA, has announced a special stock option grant to all eligible USA employees and a cash award to all eligible employees outside the USA, representing Carlisle's third broad-based stock option or cash equivalent grant to employees in the last 12 years. Carlisle believes that it is beneficial for all employees to have ownership and participate in the success of the company. This grant provides a significant incentive for the team to achieve Carlisle's long-term objectives.

Chris Koch, Carlisle Companies Chair, President and Chief Executive Officer, said, "Carlisle Companies' employees have shown remarkable resilience as well as a dedication to each other, to our customers, to our many business partners and to our communities in the face of significant challenges over the past few years. Throughout these challenges, we have stayed committed to Vision 2025, which continues to give us clear direction and consistency of mission."

"As a result, I am very pleased to announce this stock option grant or cash equivalent award so that everyone on the Carlisle team has the opportunity to participate in our success and continue to be aligned with our Vision 2025."

Carlisle Companies produces and supplies innovative building products and energy-efficient solutions for customers creating sustainable

buildings of the future. Carlisle's products help drive lower greenhouse gas emissions, improve energy savings for building owners and operators and increase a building's resiliency to the elements.

## Industry Leaders Gather In-Person at the 71<sup>st</sup> Annual IWCS Cable & Connectivity Industry Forum

IWCS, Inc. welcomed attendees to the *Cable & Connectivity Industry Forum*, the premier event for new technologies in cable and connectivity products, processes and applications, in Providence RI, USA, Oct. 10 to 13, 2022. High attendance and energetic networking showed the industry's excitement for the ability to finally network again in-person. Over 860 guests from 23 countries gathered at the **Rhode Island Convention Center** for four days of networking and learning. Attendees shared and absorbed cutting-edge research, technologies and products that are helping our industry advance nearly all aspects of our connected global society.

The event began with seven Professional Development Courses on the topics of materials, optical fiber, cop-

per and extrusion. **Andrea Caldini** of Verizon shared a Keynote presentation titled, "Technology Drivers for Deployment and Full Potential Utilization of 5G".

After the Keynote, attendees went to the Supplier Exhibition™, which was filled with more than 80 exhibitors.

The Technical Symposium featured 62 technical research papers during author presentations and poster displays. New this year, IWCS included focused panel discussions as additional event components. [www.iwcs.org](http://www.iwcs.org)

### 120 New Jobs Created Through Flexon Industries Facility Expansion

**Flexon Industries**, which is a division of the **U.S. Wire & Cable Corporation (USW)**, has recently

completed the expansion of its

Anderson County, SC, USA, plant, adding 200,000 ft<sup>2</sup> to the facility as well as 120 new jobs. A significant contributor to the economy, with 212 employees in Anderson, Flexon/USW is now the largest watering hose manufacturer and the leading maker of extension cords in North America. Annually at the Anderson facility alone, Flexon will produce enough garden hoses to wrap around the earth seven times.

The expansion will facilitate additional hiring and help the company continue its on-time delivery practices.

Also, the additional warehouse space will be used to process and store raw materials and finished goods.

As the costs of raw materials including resin and copper are rising at an unprecedented rate, Flexon says it is crucial to secure raw goods at the right time for future production so that the company's prices can remain competitive.
