Prysmian Partners with Dow to Advance the Production of Sirocco® Microduct Cables

World leader in energy transition and digital transformation, **Prysmian**, Highland Heights, KY, USA, and **Dow**, have recently partnered to advance the production of Prysmian’s Sirocco® microduct cables using Dow’s AXELERON™ Telecom Cable Compound. In 2024, Dow’s AXELERON Cable Compound and Prysmian’s Sirocco Microduct Cable were recognized as a winning co-development technology in the 2024 R&D Magazine 100 Awards in the Mechanical/Materials category. Established in 1963, the R&D 100 Awards program identifies and celebrates the top 100 revolutionary technologies of the year and is a considered a prestigious award in the research and development communities.

Yixuan Song of Dow (left) and Brian Risch of Prysmian (right).

“Through our partnership with Dow, we’re able to evolve and improve on our product lines continuously, helping our customers achieve solutions that are not only environmentally conscious but better for their bottom line,” said **Patrick Jacobi**, VP for Telecom at Prysmian North America. “Dow and Prysmian’s partnership is mutually beneficial and allows us to utilize our shared expertise to ramp up Sirocco production here in North America. We’re excited to expand on this partnership and enable new fiber technology to be more broadly distributed across our region.” www.prysmian.com

NEMA Study Highlights Need to Prioritize Grid Reliability to Meet Surging Electricity Demand

Electricity demand in the USA will increase 2% annually and 50% by 2050, according to a new study by **PA Consulting** and released by the **National Electrical Manufacturers Association (NEMA)**. Driven by record growth in data centers and e-mobility, the study highlights innovative technology and policy solutions to maintain a reliable and affordable energy system through this new age of demand growth. The study says growth in electricity demand in the USA will be driven by a 300% rise in energy consumption by data centers and a 9000% increase in energy consumption required for e-mobility and charging, with overall electricity projected to grow from 21% of final energy use to 32% by 2050. The study also identifies near-term and emerging technology solutions to make the grid more efficient to meet this demand growth. www.makeitelectric.org

Tri Star Metals

Acquires Siri Wire

Tri Star Metals, LLC, Freeport, IL, USA, a stainless and nickel alloy mill and distributor, will acquire **Siri Wire**, Danielson, CT, USA, a regional stainless and nickel alloy re-draw mill with strong distribution capabilities. Siri Wire

will continue to operate as an independent mill and distributor, led by **Bryan Hitchcock** and **David Hitchcock**. Key benefits of the acquisition include expanded capabilities, broader product range, investment in growth and commitment to tradition.

Custom Wire Products (CWP)

Acquires Little Falls Alloys

Custom Wire Products (CWP), founded by **Jeff Lawrence** in 2021, has acquired **Little Falls Alloys**, a high-performance wire

maker. The deal enhances CWP's production capacity, broadens its collective product offerings and reinforces its commitment to its customers. As part of the acquisition, the 30,000 ft² facility in Paterson becomes CWP's primary manufacturing headquarters. Little Falls Alloys will continue to run under its established name.

Copperweld Sees 110 Years of Bimetallic Innovation

Craig York of **Copperweld** reports, "This year, we mark 110 years, a milestone that reflects over a century of delivering engineered wire solutions for electrical infrastructure. Founded in 1915 in Rankin, PA, USA, we've focused on creating conductors meeting real-world demands in the industries we serve. From our home base in midsouth USA, we make bimetallic conductors designed for a balance of performance, strength and material efficiency. Through our history, innovation has been more than a goal. From the days of telegraph lines to today's ever-evolving power and data systems, our forward approach and products have helped shape the back-

bone of critical infrastructure. And our purpose stays the same: build smarter wire and cable products that meet the moment and stand the test of time."

Copperweld began with the development of Copper-Clad Steel (CCS), a material combining the strength of steel with conductivity of copper—a durable, efficient solution for grounding and other high-demand applications. In 1918, the first copper-clad ground rod was introduced and is still the standard. The firm evolved to meet the needs of utility, telecom and construction professionals. Products like ArcAngel™, Stingray™ and Sunray™ solved real challenges in the field. www.copperweld.com

UL warns industry of potentially hazardous communications cables

UL Solutions has issued public notices on  communications cables that may pose a potential fire hazard. The cables don't meet riser flame test requirements of *UL 1666*, Standard Test for Flame Propagation Height of Electrical & Optical-Fiber Cables Installed Vertically in Shafts.

Read the full public notices at:

www.ul.com/news/ul-solutions-warns-potentially-hazardous-communications-cables-0

Nortech set to serve global markets amid tariff challenges

Nortech Systems, Minneapolis, MN, USA, says it is strategically positioned to serve customers in Europe and the Asia Pacific region while mitigating the impact of global tariffs and trade challenges. While tariffs continue to fluctuate, much of Nortech's production work in China is built in-country, for-country, employing a near-shoring approach to better serve global customers with reduced shipping costs and time.

REWIREcable Conference 2025 Welcomes WCTI as Official Media Partner; 15% Reader Discount Offered

The *REWIREcable Conference 2025* announces a new media partnership with *Wire & Cable Technology International (WCTI)*, one of the wire and cable industry's most respected voices. This collaboration joins two platforms dedicated to empowering professionals with the insights, innovations and connections that matter most. The long-standing reputation of *WCTI* as a go-to resource for the global wire and cable community, delivers bimonthly publications full of technical features, industry updates and deep dives into emerging trends. As the official media partner of *REWIREcable 2025*, *WCTI* will shine a spotlight on the conference, bringing readers a front-row view of what's shaping the future of this industry. Along with exclusive event coverage, *WCTI* readers will enjoy a special 15% discount code (WCTI@REWIREcable15) to attend *REWIREcable 2025*. That's on top

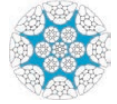

of the current advance rate prices, already discounted until May 12, 2025. So, if you've been thinking of joining us in Amsterdam, now is the time to lock in your ticket. "We're thrilled to have *WCTI* on board," said **Albert Groot-hedde**, CEO of **InnoVites**. "Their editorial integrity and global readership make them an ideal partner for *REWIREcable*. This partnership isn't just about visibility; it's about bringing meaningful content and value to professionals across the wire and cable landscape." Taking place June 3 to 4, 2025, at the **Corendon Amsterdam Schiphol Airport Tribute Portfolio Hotel**, Netherlands, *REWIREcable* will explore how AI, IIoT, ERP, MES and other smart technologies are redefining how wire and cable businesses operate and accelerate digital transformation efforts. Expert panels, demos and studies will be included. www.rewirecable.com

Europe Wire & Cable Market Growing at 5.2%

The "Europe Wire and Cable Market Opportunity, Growth Drivers, Industry Trend Analysis, and Forecast 2025-2034" from **ResearchAndMarkets.com** says the Europe wire/cable market value was US\$36.3 billion in 2024, and will reach US\$61.6 billion by 2034, at a CAGR of 5.2%. The need for efficient transmission/distribution networks fuels demand for advanced solutions. More investment in energy infrastructure is a major driver as countries modernize electricity grids. Smart grid development, renewable energy projects and next-gen power systems contribute to market growth.

Philatron meets USA-made cable demand amid Tariffs

Philatron reports that as tariffs on Chinese imports drive a historic pivot in the wire and cable industry, companies have rapidly expanded production capacity in order to meet the surge in demand for high-performance, USA-made electrical wire and cable. With strategic investments in new extrusion lines and advanced cabling lines, Philatron is now positioned to support distributors and contractors looking for fast, reliable and domestically produced wire and cable solutions.

Omni Cable Consolidates Atlanta Operations into Expanded Distribution Site

Omni Cable LLC, West Chester, PA, USA, an industry-leading redistributor selling wire, cable, fiber and other products exclusively to distributors, has consolidated its two Atlanta, GA, USA-based facilities in Suwanee and Norcross into one larger, state-of-the-art facility located in Buford, GA, USA. The new facility opened earlier this month and includes over 285,000 ft² of space that strengthens the company's ability to meet the evolving needs of its customers. www.omnicable.com

Steel Wire Business Report: Impact of Tariffs

The "Steel Wire—Global Strategic Business Report 2025" offered by **ResearchAndMarkets.com**, says the global market for steel wire was valued at US\$123.5 billion in 2024 and should reach US\$186.0 billion by 2030, at a CAGR of 7.1% from 2024 to 2030. The report offers in-depth analysis of market trends, drivers and forecasts, helping you make informed business decisions. The report also includes the most recent global tariff developments, and how they impact the steel wire market.

NKT Signs €1 Billion Supply Agreement with Hydro

NKT has signed a landmark supply agreement with Hydro to secure a long-term supply of low-carbon aluminum wire rod through to 2033, with an estimated value of some €1 billion, depending on the quantity, duration options and future metal prices. This agreement plays a crucial role in NKT's ongoing decarbonization efforts, enabling the company to deliver power cable solutions with a significantly lower carbon footprint to its customers. "This long-term supply agreement with Hydro not only guarantees a long-term,

European supply of low-carbon aluminum, it also reinforces our position as a sustainability leader in the power cable industry. It supports our strategy to continuously improve the carbon intensity of our power cables thereby supporting both our own short and long-term targets and our customers' decarbonization ambitions. Given the current geopolitical landscape, securing reliable local supply chains is increasingly important," said **Claes Westerlind**, NKT CEO/President. www.nkt.com

Southwire: One of America's Best Workplaces for women

Southwire announces its recognition as one of America's Greatest Workplaces for Women 2025 by *Newsweek* and Plant-A Insights Group. This annual list celebrates champions of inclusion through a rigorous evaluation based on an assessment of publicly accessible data, discussions and interviews with HR professionals and large-scale confidential on-line surveys. Recent Southwire commitments include broadening health benefits to provide extended bonding time for families. Eligible mothers now receive 12 work weeks for parental bonding and recovery time after giving birth, while eligible fathers

can take up to four work weeks of paid paternity leave.

Leviton Completes Expansion of North Carolina Fiber Optic Manufacturing Plant

Leviton just completed a US\$25 million expansion of its Fuquay-Varina, NC, USA, fiber optic manufacturing plant—doubling its size to keep up with soaring demand for high-speed connectivity driven by

AI, AR and cloud tech. The investment also comes amid a nationwide surge in data center construction, further fueling the need for advanced fiber infrastructure.

This expansion is set to strengthen

Leviton's USA manufacturing base while positioning the company to better serve global customers with high-performance fiber solutions.

On April 9, 2025, Leviton marked the occasion with a ribbon-cutting ceremony alongside local officials and employees. The factory size has been doubled and produces multi-mode and single-mode cabling for data centers, enterprises and industrial networks. www.leviton.com/ns
