### Nexans Wins Supply Contracts in France & Brazil

Nexans has been awarded its first over three-year traction cable contract for the Grand Paris Express by the installer **VINCI-Energies Traction**, consortium composed by **Cegelec Mobility** and **SDEL Transport Grands Projets**, two company parts of VINCI-Energies. The Consortium is in charge of providing the energy traction supply for the new metro line 15 South section.

Nexans is also the first cable maker to receive an order for this infrastructure project. For more than three years, Nexans will design, produce and supply over 240 km of traction cables to be installed along the rails for safer and more reliable traction power for the metro Line 15 South. Also, logistic services could be provided with the "PRIME Offer" of the **Nanterre Logistics Center**, where Nexans has invested €1.5 million in additional capacity.

Nexans has also extended its long-standing relationship with the **Subsea Integration Alliance (SIA)** by winning a major contract to design, manufacture and supply 44 km of steel tube umbilicals and accessories for the Ba-

calhau ultra-deepwater oil field development project. Nexans' specialized facility in Halden Norway will provide the SIA with steel tube umbilicals to provide vital services for subsea equipment operating at water depths down to 2100 m. This includes 2.5 km of gas-lift umbilical, 35 km of static umbilical, 6.9 km of dynamic umbilical and accessories. Nexans will deliver the umbilicals in Q4 2022. [www.nexans.com](http://www.nexans.com) ■

### NKT Invests Millions in HV Cable Factories & Logistics

In 2020, NKT was awarded large high-voltage power cable projects for €2.3 billion supporting the transition to renewable energy including a substantial part of the German Corridor Projects designed to transmit green

power from across the country. For NKT, the large order backlog and the accelerated transition to renewable energy provides opportunities for future growth, and NKT is investing over €150 million in its high-voltage power cable manufacturing and logistics. The growing focus on renewable energy is a natural step for NKT to continue to develop high-voltage power cable capacity, capabilities and technology. NKT prepares for future growth and for execution of its large order backlog of offshore wind

and interconnectors projects. [www.nkt.com](http://www.nkt.com) ■

### AEI Cables Wins Major Contract for Hong Kong International Airport

**TheBigRedGuide.com** reports that **AEI Cables** has won a multi-million dollar contract to supply low-voltage power and fire performance cables to the Sky City project at **Hong Kong International Airport (HKIA)**. The supply of the cables for power, control and fire performance for the commercial and retail part of the site starts in September 2021 and will continue until early next year. AEI Cables will work with its Hong Kong distributor, **Fordex Electric Co. Ltd.** for the project.

## Southwire Honors Its Veterans & Enters Partnership with Wounded Warrior Project

**Southwire's** legacy has long been defined by service, a belief in doing what one person can to make a difference. In honor of Military Appreciation Month, the company dedicated time in May to pause, reflect and recognize the contributions of Southwire veterans and members of the military in its communities through many activities. Most notably, the company announced a three-year, US\$300,000 partnership with Wounded Warrior Project® (WWP). With a strong financial investment, this commitment will support Southwire's veteran recruitment, employee en-

gagement, disability awareness and commercial projects.

Southwire's Officium Employee Resource Group, which works to enrich the lives of veterans at Southwire, led the company's efforts to honor the month. [www.southwire.com](http://www.southwire.com)

### PDi2 welcomes Prysmian Group North America as board level member

Power Delivery Intelligence Initiative (PDi2), Cooperville, MI, USA, welcomes Prysmian Group North America as a board level member. Prysmian Group is a global leader in the energy and tele-com cable systems industry. The Group designs and produces cables and solutions for the transmission and distribution of low, medium, high and extra high-voltage systems in addition to state-of-the-art solutions for high-voltage underground and submarine cable links in some of the most challenging environments.

Landry Molimbi, Head of Asset Management and Prysmian Electronics, Prysmian Group North America, is the member representative to PDi2.

### Fugro finishes first phase of trans-pacific Bifrost cable

Fugro has completed the first phase of its marine site characterization project for Alcatel Submarine Networks (ASN) to support the Bifrost Cable System, a new undersea fiber optic cable system that will connect the west coast of North America, Guam, Indonesia, the Philippines and Singapore. The transpacific routes off the west coast of North America have now been surveyed and the project will soon continue on the Indonesia segment through the Celebes and Java seas.

ASN is installing the cable system for a consortium comprising Kep-

## Tratos Awarded Five-Year Contract by Network Rail

**Network Rail** has awarded cable manufacturer **Tratos UK Ltd**, Knowsley, Merseyside, England, a five-year cable supply framework contract. The company, which has been innovating in the rail sector for more than 50 years, was awarded the contract after meeting the stringent quality, technical and commercial requirements of one of the UK's largest organizations. Welcoming the news, Tratos CEO **Dr. Maurizio Bragagni** said, "We are looking forward to working closely with Network Rail. We are unusual in the cable industry – in what we do, in the way we do it and in the way our company operates. We are in the business of solving problems,

creating solutions that contribute to a cleaner and environmentally friendly way of keeping the world's mass transit industries moving." The products to be supplied to Network Rail will be manufactured and stocked at Tratos' Knowsley facility in Liverpool, a site that it has recently invested upward of £25 million, including a cable testing facility which will be used in servicing the Network Rail contract over the next five years. ### Priority Wire Increases Charges for Building Wire

Higher lumber costs cause **Priority Wire** to increase its Cut and Parallel charges for Aluminum Building wire. New Cut Charges are 6 awg to 4/0 awg: US\$25/cut; 250 mcm to 500 mcm: US\$50/cut; and 600 mcm to 1000 mcm: US\$60/cut. New Parallel Charges are 6 awg to 4/0 awg: US\$40/leg; 250 mcm to 500 mcm: US\$60/leg; and 600 mcm to 1000 mcm: US\$70/leg. You can avoid or limit Cut and Parallel charges by purchasing random stock lengths, considering for short cuts or parallels, layer winding onto the reels and buying bulk reels or standard length reels.

### LAPP Introduces 12 New Cable Products

The LAPP portfolio is being expanded continuously, with a variety of new products for industrial communication, mechanical and plant engineering

and the rail industry. Solutions for industrial communication are the ETHERLINE® T1 product family, ETHERLINE T1 Y Flex 1x2x22/7 AWG products, highly flexible ETHERLINE FD Cat.6 patch cables and ETHERLINE CABINET CAT.6A for the control cabinet in PROFINET® networks. Solutions for mechanical and plant engineering include UNITRONIC® LiYY BK, twisted pair version UNITRONIC LiYY (TP) BK, single core H07V-U with HAR design certification, ÖLFLEX® PLUG 540 P with the proven ÖLFLEX 540 P cable for appliance and cabinet construction and the metric, liquid-tight SILVYN® FPAD-M. LAPP is also strategically expanding its portfolio for the rail industry. The single-core cable ÖLFLEX® TRAIN 331 600 V for rail vehicles is now also now be provided in further dimensions (0.5 mm<sup>2</sup> and 0.75 mm<sup>2</sup>) as well as in additional colors.

### AMI Report: European Cables Market Recovers Strongly from Pandemic; Continued Growth Expected through 2025

AMI Consulting experts in the plastics market, just published the new edition of its in-depth market report that analyses the use of polymeric materials in the

# AMI

European cables industry. This niche but high-value market saw an increase of 2.8%/year between 2016 and 2019. During this time, the problems suffered by the automotive sector offset the growth seen across other applications such as renewables or telecommunications. In 2020, the industry was negatively impacted by COVID-19, in particular during the year's first half. But the market has seen a strong beginning of 2021 and it is expected to reach pre-COVID levels despite the raw material sourcing issues faced across the supply chain early in the year. The future for cables in Europe looks bright as it is expected to grow at a faster rate between 2019 (pre-COVID levels) and 2025. Growth will be mainly

driven by investment in infrastructure, construction and renewables.

The AMI report quantifies the market and identifies its demand drivers, material selection trends, the regulations affecting and the changes underway. The report also provides a historic snapshot of the industry's biggest players and a site-by-site outline of polymeric material consumption. It provides an analysis of the past and an outlook for the future, based on 2016-2020 data and forecasts for 2021-2025.

*Polymeric materials in the European Cable Industry 2021* aims at assisting industry participants and investors understand the size, structure and growth of the market, anticipate change, direct resources and proactively manage threats and opportunities.

For more, email **Cristina de Santos** at: [cristina.desantos@ami.international](mailto:cristina.desantos@ami.international). [www.ami.international](http://www.ami.international)

dent, Robert Cameron, will continue his active involvement in the company and join the company's Board of Directors. As part of the transaction, Kinderhook adds several of its Operating Partners to Cameron W&C's Management and Board of Directors, including Ed Flynn, former CEO of International Wire Group, and Craig York, CEO of Kinderhook portfolio company, Copperweld.

[www.kinderhook.com](http://www.kinderhook.com)

### LAPP price adjustment

LAPP reports that since its last price announcement, its noncopper input costs have continued to escalate. Therefore LAPP has

announced percentage increases and costs including 6% to 8% for insulating and jacketing materials and compounds; up to 26% for color concentrates; 9% to 24% for tapes and fillers; 9% to 25% for reels and packaging; and in excess of 10% for transportation.

## Interwire 2021 Reports Company Sponsors & Registration Details for October Event

The Wire Association International (WAI), Inc. announces the participation of 20 company sponsors that support Interwire 2021 and the WAI's 91<sup>st</sup> Annual Convention, which will be held at the Georgia World Congress Center (GWCC), Atlanta, Georgia, USA. The new show dates are October 26 to 27, 2021. Guests will be able to explore the technologies associated with Industry 4.0—the theme for the event—by visiting the Industry 4.0 pavilion, the various exhibits, presentations and briefings on the topic.

Interwire 2021 registration is now open at the website below. Since all activities will be held on the exhibit floor, registration includes the Industry 4.0 sessions, exhibits, keynote, production solutions, and welcome reception. Advance registration pricing is as follows: WAI member: US\$75; New WAI member: US\$140; Nonmember: US\$175. Registration for the hybrid Fundamentals of Wire Manufacturing course is separate as follows: WAI member: US\$295; New WAI member: US\$395; Nonmember: US\$445. ## EWPTTE 2022 Issues "Call For Participation"

WHMA/IPC expands the Educational Offerings at *Electrical Wire Processing Technology Expo (EWPTTE 2022)* to lead, educate and connect with firms in the cable and wire harness industry. WHMA/IPC invites engineers, researchers, academics, industry experts/leaders to submit technical conference abstracts for *EWPTTE 2022*, May 10 to 12, 2022, at the **Wisconsin Center** in Milwaukee, WI, USA. An approximate 300-word technical

conference abstract summarizing original and unpublished work covering case histories, research and discoveries must be submitted. These should describe significant results from experiments and case studies, emphasize new techniques, trends of interest and contain appropriate technical results. Presentations will be limited to 30 minutes. Paper abstracts and course proposals are due November 16, 2021. [www.electricalwireshow.com](http://www.electricalwireshow.com)

ensuring that the company continues to provide excellent customer support. When it comes to sales, marketing, and customer engagement, Liacouras has plenty of experience that will benefit both Allied Wire and Cable and its customers.

## Global Cable Market to Hit US\$425.4 Billion by 2025

According to a new report from **BCC Research LLC**, Wellesley, MA, USA, the global cables market is expected to grow from US\$336.2 billion in 2020 to US\$425.4 billion by 2025 at a compound annual growth rate (CAGR) of 4.8% for the period of 2020-2025.

The report forecasts the size of the power and telecom cable market for components from 2019 through 2025. The Executive Summary provides a snapshot of key findings of the report. The report's Overview and Definitions chapter introduces cabling applications and technologies. The Detailed Market Breakdown chapter provides an all-round view of the power cable and telecom cable market.

The chapter on Raw Materials and Pricing reviews availability and pricing scenarios of major raw materials and continues with an analysis of the pricing trends of different types of power and telecom cables. The Vendor and Market Analysis chapter analyzes the broad trends governing the cabling market. The U.S. Patent Analysis chapter analyzes U.S. patents granted in the relevant areas of power and telecommunications cables.

# EVENTS & OPPORTUNITIES

June 14, 2021

## Strong Industry Support for wire 2022 & Tube 2022

Since the exhibitor registration for *wire 2022* and *Tube 2022* opened in March 2021, it has been apparent that the wire and tube industries are committed to the two events. **Messe Düsseldorf** says that it looks forward to making the trade fairs the international business platforms for the sectors again next year. *wire* and *Tube* take place May 9 to 13, 2022, at the fairgrounds in Düsseldorf, Germany.

The hall planning for both trade shows begin on June 30, 2021, which is also the official exhibitor registration deadline.

*wire 2018* and *Tube 2018* exhibitors can easily register for the 2022 trade show events with their existing log-in, and they can make necessary changes on the registration form. First-time exhibitors will be guided step-by-step through the online application process at the website below.
